Full Stack Developer. Work experience developing with Node, React, Redux, PostgreSQL, MySQL among other industry technologies. Participated as technical leader on the creation of a gamer hardware selling website. I consider myself a creative and proactive person with problem solving skills who feels comfortable working in groups, has great communication ability and is self driven.

ACADEMIC BACKGROUND

• **Tecnicatura Superior en Análisis, Desarrollo y Programación de Aplicaciones** // ISFT 194 // 4 years // 2023

Analyst, programming and app development advanced degree

• **Node backend and SQL refresher course** // Alkemy Acceleration // 6 weeks // 2022

• **Full Stack Web Developer** // Henry Bootcamp // theory and practice 700 hours course // 2022

• **Profesorado en Tecnologías en Industrias de Procesos** // Instituto Superior de Formación Docente y Técnica SUETRA // 2015 ~ 2019
Processing Industries Technology Teaching degree

DEVELOPMENT EXPERIENCE

• **NGO Backend (Alkemy acceleration project)**

Server software with Restful API and MySQL database. Including the use of the following services, technologies, frameworks and libraries: *Express, Sequelize, SendGrid, JWT, Swagger, Mocha, Chai, Supertest*

• **Countries webapp (Individual project at Henry)**

Web app developed using React / Redux on the client side and Node / Express / PostgreSQL on the backend. The application features an API to load database records and make it ready for its first use.

• **Hardware e-commerce website (Final project at Henry)**

Developed with React / Redux on the frontend and Node / Express / PostgreSQL on the backend.
